VACUUM TUBE LIFTER JUMBO

BARREL-VACUUM HEAD

VACUUM HEAD EG 85-SO 180° WENDEN

This ergonomic barrel gripper with 180° turning function has been built for reloading brewery equipment or commissioning tasks in barrel stores. The „ears“ at the side of the gripper cup are made for easy finding the right position at the turning axis, without taking care of barrel position. Even if barrels are delivered on a trolley up side down an easy pick up and turn is given for stacking.
